Monthly Indicators

A RESEARCH TOOL PROVIDED BY THE UPSTATE ALLIANCE OF REALTORS® MULTIPLE LISTING SERVICE

May 2012

Spring has brought both change and clarity to our local market. Some sellers are seeing competing bids on their properties which have led to modest price gains. Buyers have fewer options from which to choose in many submarkets. Headlines and sound bites can often mask regional variability. With fewer distressed properties selling, prices are effectively "melting up" due to less downward pressure. May looked pretty good all around.

- New Listings decreased 0.5 percent to 1,063.
- Pending Sales were up 12.5 percent to 693.
- Inventory levels shrank 2.4 percent to 3,875 units.
- The Median Sales Price increased 11.3 percent to \$108,000.
- Percent of Original List Price Received decreased 1.2 percent to 92.9.
- Months Supply of Inventory was down 13.1 percent to 7.6 months.

In economic news, May's jobs report was disappointing, and there's a growing concern about the pace of domestic growth. Last month was also unsettling for investors, prompting some to hunt for better returns in the housing market. This forces other consumers up the price ladder. In politics, the Senate approved a 60-day National Flood Insurance Program extension. But with campaign season upon us, major housing-related bills or policy shifts are unlikely.

Historical Percent of Original List Price Received

Housing Affordability Index

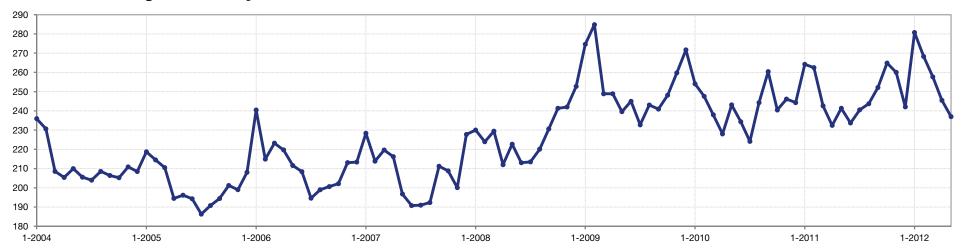

This index measures housing affordability for the region. An index of 120 means the median household income was 120% of what is necessary to qualify for the median-priced home under prevailing interest rates. A higher number means greater affordability.
